# Bus Ticket Booking

## Aim:

To create a web API "BusTicket Booking" on ZOHO Creator

## Procedure:

-> Create an account in ZOHO, if you don't have. you can use it for 15-day's free trail

-> After logging in, create a new application and name it as "~~Bus~~ Ticket Booking".

-> The structure of API is defined by the fields for application:

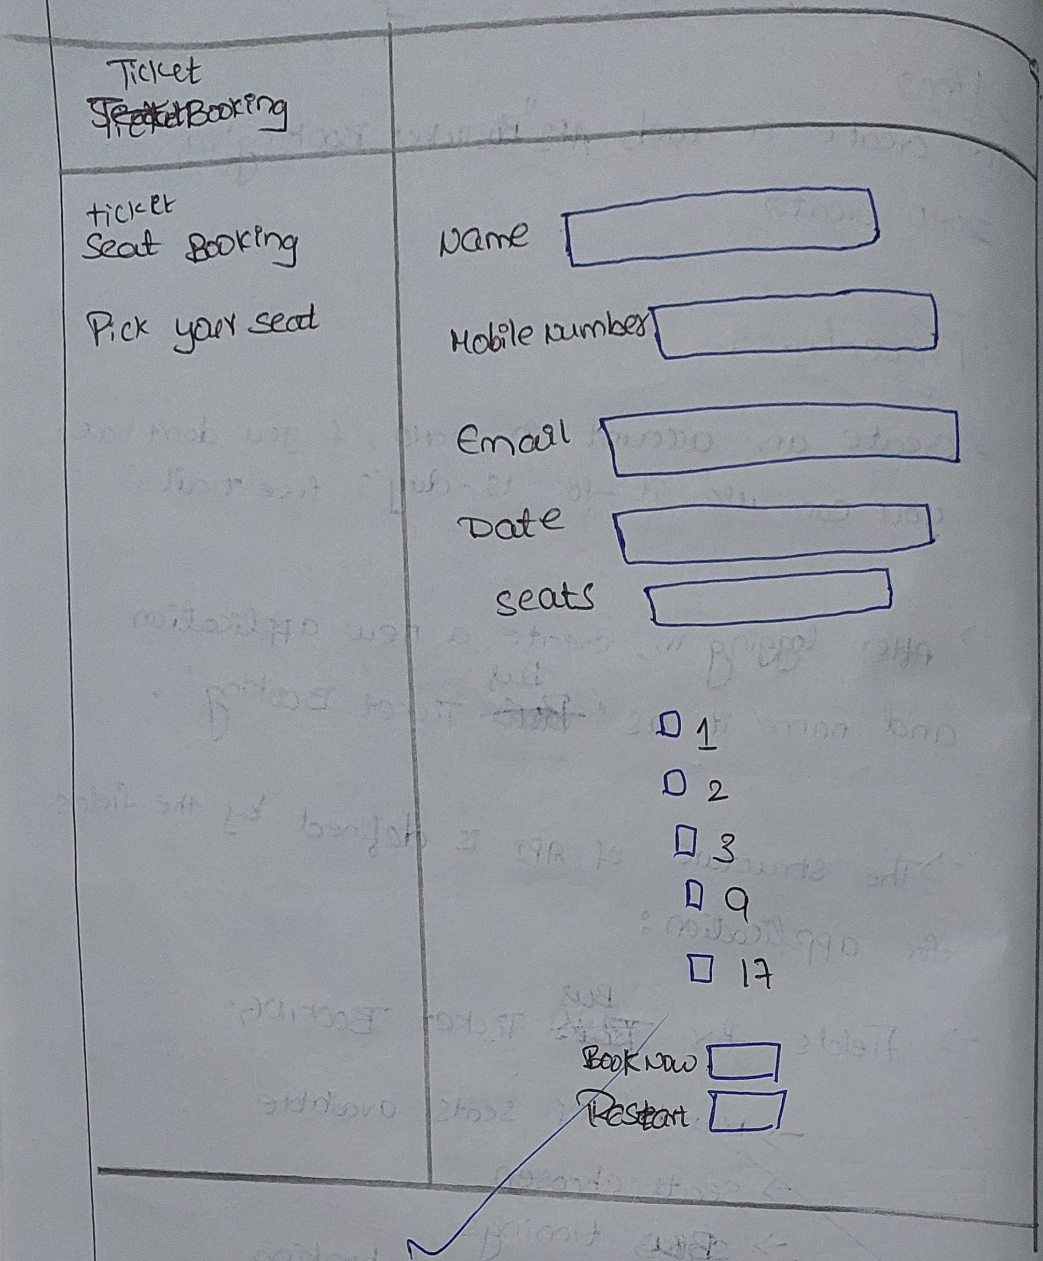
-> Fields for ~~Bus~~ Ticket BOOKING:

- -> Number of seats available
- -> seats choosen
- -> ~~Bus~~ timings
- -> option to cancel booking

-> Create forms to collect from the user who want to book Bus ticket using drop-drag interface it is easy to create form.

-> ~~Creat~~. Choose an open-Builder format for the changes in the form

-> Click on "done", once it gets completed now the web application is created.



Result

Here we have successfully completed a web api named "Bus Ticket Booking by using ZOHO Creator.
