

Sports Ground BOOKING

Aim:

To create a web API "Sports Ground Booking" using 2010

Procedure:

→ Sign up for 2010.com. If you don't have an account, you can use it for free plan 15 days

→ After logging in, create a new application and give it a name

→ The structure of API is defined by the fields of application.

Fields of Sports Ground Booking like

Name of Organisation

• Name of Event / Activity

• Event / Activity type

• venue

• Planned Events / Activities

→ Create forms to collect data from users who want to book. By using drop and drag interface it is easy to create form.

→ for making changes in the fields of API, select open builder and edit.

* Adding, Deleting like options are available to edit field names.

* Click "DONE" after editing. Now the web API Sports Ground Booking is created.

Sports Ground Booking	Name of organisation: <input type="text"/>
Book your venue	Name of Event: <input type="text"/>
	Event Type: <input type="text"/>
	venue : <input type="text"/>
	Planned Events: <input type="text"/>
	Any facilities Required: <input type="text"/>
	Contact Information: <input type="text"/>

Name
Position in organisation
Mobile number
Email
Address
Book now

Result:

Hence the Sports Ground Booking has been created successfully using ZOHO creator.
