

5) Create a virtual Hard Disk and allocate the Storage using VM ware workstation.

Aim:

To create a virtual Hard Disk using VM ware workstation Pro

Procedure:

- open VMware workstation Pro and select the virtual machine you want to create the virtual hard disk for.
- click on the edit virtual machine settings (open) option.
- In the virtual Machine settings window, click on Add.
- Select the Hard Disk and click Next.
- choose whether to create a new virtual disk (i) use an existing one, and click Next.
- Select the disk type (either, ~~SCSI~~ IDE) and click Next.
- choose the disk Space (i) just a 'certain' (arrow) amount and click Next.
- Choose the disk file location and name and click Next.
- Review the settings and click finish.

You have now created a virtual hard disk and allocated storage for your virtual Machine.

Output

Padma Priya

VM Devices

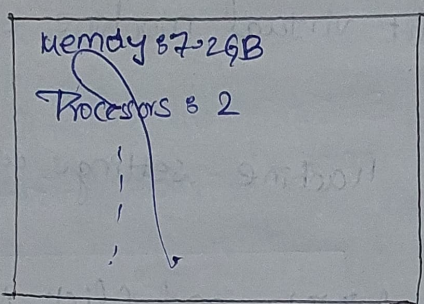

Memory : 7.2 GB

Processors : 2

Hard Disk (SCSI) : 4 GB

Hard Disk (VHM) : 2 GB

Network Adapter : NAT
