Virtual Machine with 1 CPU; 2GB and 15GB disk.

1) Create a virtual Machine with 1CPU, 2GB RAM and 15 GB disk. Using a type 2 virtualization, machine software.

Ans. There are a step-by-step guide on how to create a virtual Machine with 1CPU; 2GB RAM; and 15 GB storage disk using a type 2 virtualization software.

→ Download and install a type 2 virtualization software like or de virtualization boxi VMware player

→ Open the virtualization software and click on the 'New' button to create a new virtual Machine.

→ In the new virtual Machine wizard, give your virtual Machine a name.

→ Select the operating system you will be installing click 'Next to Proceed.

→ In the "memory" section; choose 2048 (2GB) RAM for your virtual machine.

→ click "Next" to Proceed.

→ In the "Hard Disk" section, select.

→ Create a virtual hard disk now and click "Create".

⇒ Choose VDI (Virtual Disk Image] as the hardddisk file & click "Next"
& Press the done botton to complete the web APS for 1⇒Y

⇒ Select dynamically allocated as the storage on physical hard disk and click "Next".

⇒ In the "System" section; choose 1CPU in the "Processer" tab.

* Click "OK" to save your settings.
* Start your virtual Machine and proceed with the installation of our operating system.

    That's it! you now have a virtual machine with 1 cpu, 2GB RAM and 15GB storage disk using a type 2 virtualization software

State : Powered Off

OS & windows

version & workstation

RAM & 2GB

Virtual Machine Name : Priya

State : Powered off

OS : windows

Version : workstation 17.x virtual Machine

RAM : 2GB

Result :

Hence we successfully completed web api named VM 1CP 2GB & 15GB disk by using VM workstation
